Interior Styling
Certificate Course

Our spaces have their own identity and defines those who reside in it. We now want our spaces custom made as per our likes. These spaces are sought to be elegant and provide us the utmost comfort. There are many aspects to design including texture, color, composition, and arrangement. A living and working space is a reflection of the people who live in it. The objective of the modules in this course is to provide the students with knowledge and skills to understand and apply basic principles of Design to the domain of Interior Decoration. This is a part-time certificate course to develop one's skills and will cater to the following modules:

COURSE MODULES

Drawing Foundation: The objective of this module provides the students with the skills to use freehand drawing as a mean to express design ideas. Familiarize students with a range of sketching and rendering techniques to further communicate these design thoughts effectively.

Hands-on drawing exercises enable students to gain knowledge and confidence in their power of visualization and the development of perception and execution skills.

Materials and Finishes: The module deals with knowledge of vertical and horizontal surface finishes like wood, metal, flooring etc used in interior spaces. The student will be exposed to different materials for interior surfaces. A critical understanding of sustainable design and ecological issues related to materials will be discussed. Students will learn how to select and use appropriate materials and finishes for different interior spaces such as residential and/or commercial projects.

Introduction to Furniture: This will help the student understand the standard dimensions, history of furniture and latest design trends.

Design Concept: The module deals with elements and principles of Interior Decoration and their application in order to decorate any interior space. The objective of this module is to provide the students with knowledge and skills to understand and apply basic principles of Colour Theory in the Interior Design domain. The module emphasis is on the study of properties and visual phenomena in the field of Interior Design.

Basic Computers: The objective of this module is to provide the students with knowledge and skills to understand and use basic graphic software in order to create and edit images and layouts. The process of learning will demand the use of appropriate software available in the working market such as Adobe Photoshop, Adobe Illustrator, Sketch Up and Microsoft Power Point (or equivalent). The emphasis will be to develop skills to produce 2-D presentation layout.

Interior Hardware and Accessories: This module will introduce to student to Accessories, trends and their usage.

Basics of Construction and home styling: This module enables the student to understand the building standards as well the technicality behind it. It will also introduce the student to the various home decoration styles.

Design Studio: The objective of this module provides the students with knowledge and skills to be able to analyze and develop interior spaces for typical residential projects. Following the study of abstract fundamentals of space and form in design principles, students will apply these principles for the planning of interior spaces.
