UNIVERSITY

Mechanical Engineering Department

Seminar Report
On
“Basic Tools, Measurement & Terminology used in Production
Technology”

4 Feb 2017 & 7 Feb 2017

This activity was conducted by the department of Mechanical Engineering for mechanical engineering students of Ist year department. This activity was based on seminar as well as hand on practice, which was divided into two modes.

Seminar was given by the internal faculties with the involvement of IIIrd year students of the department under the supervision of department head. During the seminar, faculties were showing most of the tools and also explaining the application part. Each and every student had got several devices such as dial gauge, slip gauges, filler gauge, different types of opener, files, hammer etc. which was new for Ist year mechanical engineering students. Also they were showing their interest in that two days activity.

Faculties were arising basic questions and students responding in the positive way. They were done the measurements by their own and at last students got to know about the basics of tools, gauges as well as terminology which are used in production technology. Over all feedback from the side of students was quiet very good, they were felt happy after the session.
