

POORNIMA UNIVERSITY

SCHOOL OF MANAGEMENT & COMMERCE AND SCHOOL OF ENGINEERING & TECHNOLOGY

Report on Dr. Rajat Agrawal's Session

Date of Program: May 05, 2018

Topic of Lecture: Industry 4.0 & India

In the continuous series of inviting distinguished academic personalities for rigorous interactions, this Saturday, Poornima University students of B Tech, MBA & BBA, were privy to hear an eminent professor, Dr. Rajat Agrawal from IIT Roorkee, who delivered a special lecture on the upcoming trends in the industrial scenario of the world, and how will these trends affect the Indian economy.

In his interaction with the eager students, Dr. Agrawal explained the concept of 'Cyber – Physical Systems' and the various aspects related to it, like: Big Data, Cloud Computing, Cyber Security, Additive Manufacturing, Augmented Reality, Intellectual Property and Robotics. Dr. Agrawal, during his lecture, emphasized on the changing scenario of the employment sector of the world, in general, and India, in particular, and shared some very practical tips related to re-alignment of skill – sets of the students to suit the changing markets. Laced with practical examples and live industry scenarios, this session saw discussions over the status of manufacturing sector in India, and comparison with China over the IPR filings and the importance of becoming knowledge hub of the world for India to prosper in this century. Dr. Manoj Gupta, Pro – President (In Charge), Poornima University elaborated on the various efforts taken by the University in imparting the knowledge and training related to the concepts discussed in the session, while exhorting the students to take advantage of such sessions in augmenting their learning.
